EDUCATION

University of Texas at Austin – Austin, TX **Relevant Coursework:** *Intro to Electrical Engineering, Intro to Computing*
Major- Electrical and Computer Engineering

Class of 2030

LEADERSHIP EXPERIENCE

DCHS Computer Science Team

August 2022 - May 2026

Captain | 1-Time State Qualifier | 3-Time Regionals Qualifier

- Led afterschool programming practices and collaborated with teammates to strategize competition techniques.
- Developed and debugged Java programs to solve programming challenges and automate solutions such as scoreboards, grading systems, and implemented an autonomous pathing system using 3 odometry pods for Robotics.
- Competed in computer science competitions, qualifying for State once and Regionals three times.

DCHS Robotics Team

August 2022 - May 2026

Captain | 4-Time State Qualifier

- Led robotics team projects while developing 100+ hours of Java programming and 100+ hours of CAD design experience.
- Collaborated with teammates to design, program, test, and improve robotic systems for competitive events.
- Applied technical problem-solving and project management skills to support a 4-time state-qualifying team.

Marching Band- Trumpet Section Leader

August 2022 - May 2026

First Chair | 1-Time State Qualifier | 2-Time All-Region Band Qualifier | 2-Time State Solo & Ensemble Qualifier

- Served as a section leader for 2 years, supporting and coordinating with fellow musicians to improve group performance.
- Dedicated 1,000+ hours to instrumental practice and performance, demonstrating strong discipline, consistency, and time management.
- Collaborated with a large ensemble to prepare for performances and competitions, earning 2 All-Region Band qualifications and a state qualification.
- Mentored and assisted younger musicians by providing feedback, leading rehearsals, and helping the section develop stronger performance skills.

PROJECTS

Autonomous Pathing

- Programmed with an autonomous robot motion-planning and path-following system that uses pose estimation, Bezier-curve path generation, and closed-loop feedback control to navigate a robot accurately through predefined trajectories.

WORK EXPERIENCE

Pizza Hut – Seminole, TX

June 2025 - August 2026

Cook

- Managed multiple customer orders in a fast-paced environment while maintaining accuracy, quality, and strict time constraints.
- Collaborated with team members to coordinate workflow and efficiently complete high-volume orders.
- Followed standardized procedures and safety requirements while maintaining an organized and clean workstation

SKILLS

- Design Tools — Onshape, Tinkercad | 100+ hours | LTspice, KiCad | 50+ hours
- Java Programming — Eclipse Workspace, Android Studio | 100+ hours

- Team Leadership & Project Management
